

Making our community a Gigabit community

Coming to Victor...new technology & even faster internet!

CTC is starting a project that will ultimately bring the latest technology and even faster internet service to your home or business through a new fiber optic network. The project will take five years to complete and is \$8.5 million dollar investment that will benefit all customers in the Cooperative Telephone Company exchanges.

We are starting this project in March by installing needed equipment at homes and businesses in Victor. CTC's customer service staff will contact you regarding this phase of the project. In May or June, we will begin the initial construction work for the fiber network itself.

Please contact us if you have any questions and be sure to visit our website for the latest project updates.
